ExcellCity: Strengthening the Scientific Excellence and Innovation Capacity in the Area of Smart City through Twinning

2025 EXCELLCITY SUMMER SCHOOL INTELLIGENT CLOUD CONTINUUM

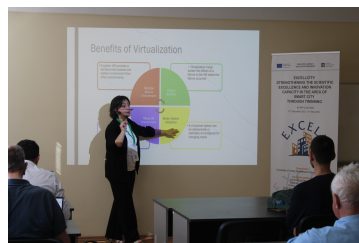

From 2 to 6 June 2025, the University of Library Studies and Information Technologies (UNIBIT) hosted the international 2025 EXCELLCITY Summer School: Intelligent Cloud Continuum. The event brought together a diverse group of participants—professors, PhD students, and undergraduates—who explored cutting-edge approaches in cloud and edge computing, artificial intelligence, IoT, and digital twins.

During the seminar, participants explored:

- **Cloud-to-Edge Continuum and Intelligent Task Distribution,**
- **Digital Twins and IoT Integration,**
- **Big Data Architectures and Microservices**

Distinguished speakers from the University of Murcia and the University of Messina presented advanced platforms and tools such as Eclipse Ditto, FogFlow, FIWARE, Docker, and Hadoop. The program featured hands-on sessions, interactive discussions, and networking opportunities that encouraged scientific collaboration and knowledge exchange.

All participants received official certificates of attendance. The summer school reaffirmed its role as a key platform for digital transformation, innovation, and interdisciplinary cooperation in the academic and technological community.
